JFS

Job File Scheduler™ (JFS) is a web-based, fully functional automation program that minimizes redundant daily tasks and frees the IT department to work on more pressing issues. This integrated management tool enables the scheduling, tracking and reporting of automated tasks such as backups, processing and maintenance.

eAlerts!

eAlerts!™ Email Notification System provides members with real-time notification, via email or text, as important account events occur. When integrated into your existing online banking site, this cutting-edge solution reduces call center demand, accelerates fraud detection and provides a competitive advantage.

reMember

reMember™ is a Membership Profile Application that tracks individual member preferences, relationships, interests, etc., for the purpose of relationship building and cross-selling. You can also create key reports and dashboards to track and manage crucial metrics relative to your members and relationships.

Executive MS

Executive Management System™ is a data visualization application that allows you to measure and share key metrics. You can easily implement and customize both Dashboards and Reports to share strategic performance indicators. Filter your data the way you want!
